

# HTML AND CSS QUICK REFERENCE GUIDE

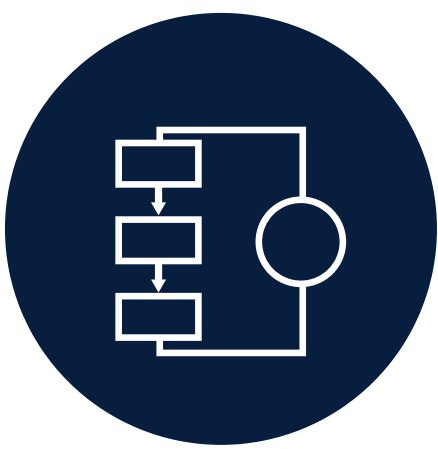

[www.bosscreative.com/blog](http://www.bosscreative.com/blog)

**CODE MAKES UP EVERYTHING AROUND YOU.  
IT'S TIME YOU LEARN HOW TO USE IT.**

## LEARN THE BASICS

Most HTML elements have an opening and closing tag. Tags can go inside other tags. Content goes inside these tags. You can add video, images, links, tables, and more with a few simple commands!

## KEEP LEARNING AND TRYING OUT NEW THINGS

There are a ton of awesome features out there waiting for you to learn. Take some time to learn a couple new coding tricks each month so that your content is top notch!

## HTML VS CSS

HTML should be used for structure and content. CSS, on the other hand, should be used for presentation

## CUSTOMIZE TO YOUR HEART'S CONTENT

Once you understand the basic structure and functions of coding, you can begin customizing to achieve your desired look and flow. You can change color, size, font, imagery, layout, and more.

**IT TAKES TIME AND PATIENCE, BUT IT PAYS OFF!**
